

## Fuels Reduction Treatments proposed in Blaine County

| Fuel Hazard Ranking | Project                            | Purpose and Need                                                                                                                                                                                               | Coordinating Agencies                                                                                                                                                         | Benefit to the Community                                                                                                                                                                           | Location                                                                                                    | Description                                                                                                                                                                                                                                              | Approx. Acres | Polygon    |
|---------------------|------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|------------|
| EXTREME             | Smiley Creek                       | Reduce the Hazardous Fuels surrounding homes in the Urban Interface by establishing perimeters of allowable vegetation at the 30, 50 and 100 foot radii. Remove dead trees on property beyond perimeter radii. | Funding and equipment provided by Blaine County. Treatments to be carried out by Smiley Creek Fire Protection District. Coordinate efforts with surrounding Federal Agencies. | Reduces the threat of wildland fires spreading to homes and creates survivable space. The health of the forest is improved as is wildlife habitat. Treatment provides some economic opportunities. | Forest Service, BLM, and private lands adjacent to homes in the Smiley Creek Subdivision.                   | Mechanically treat overgrown, dense conifer stands. Limb up and thin landscaped areas around homes using hand tools. Use chippers or pelletizer equipment to recycle biomass products. Need additional water supply, need to keep access roadways clear. | 10            | Conifer 17 |
| HIGH                | Beaver Creek, Justus Ranch         | Reduce the Hazardous Fuels surrounding homes in the Urban Interface by establishing perimeters of allowable vegetation at the 30, 50 and 100 foot radii.                                                       | Funding and equipment provided by Blaine County. Treatments to be carried out by contracted group. Coordinate efforts with surrounding Federal Agencies.                      | Reduces the threat of wildland fires spreading to homes and creates survivable space. The health of the forest is improved as is wildlife habitat. Treatment provides some economic opportunities. | Forest Service, BLM, and private lands adjacent to homes in the Beaver Creek area.                          | Mechanically treat overgrown, dense conifer stands. Limb up and thin landscaped areas around homes using hand tools. Use chippers or pelletizer equipment to recycle biomass products.                                                                   | 25            | Conifer 20 |
| Mod-High            | West of Little Wood Reservoir Road | Reduce the Hazardous Fuels surrounding homes in the Urban Interface by establishing perimeters of allowable vegetation at the 30, 50 and 100 foot radii.                                                       | Funding and equipment provided by Blaine County. Treatments to be carried out by Carey Fire Protection District. Coordinate efforts with surrounding Federal Agencies.        | Reduces the threat of wildland fires spreading to homes and creates survivable space. The health of the forest is improved as is wildlife habitat. Treatment provides some economic opportunities. | BLM and private lands adjacent to homes near West of Little Wood Reservoir Road, Foothill, Dry Creek Roads. | Mechanically treat the areas of sage brush. Limb up and thin landscaped areas around homes using hand tools. Use chippers or pelletizer equipment to recycle biomass products.                                                                           | 350           | Shrub 76   |
| Mod-High            | Scott Road, Carey                  | Reduce the Hazardous Fuels surrounding homes in the Urban Interface by establishing perimeters of allowable vegetation at the 30, 50 and 100 foot radii.                                                       | Funding and equipment provided by Blaine County. Treatments to be carried out by Carey Fire Protection District. Coordinate efforts with surrounding Federal Agencies.        | Reduces the threat of wildland fires spreading to homes and creates survivable space. The health of the forest is improved as is wildlife habitat. Treatment provides some economic opportunities. | BLM and private lands adjacent to homes in the new Scott Road Subdivision.                                  | Mechanically treat the areas of sage brush. Limb up and thin landscaped areas around homes using hand tools. Use chippers or pelletizer equipment to recycle biomass products.                                                                           | 33            | Shrub 80   |

| Moderate            | North of Carey, between Austin, Little Wood Reservoir, and Barton Roads. | Reduce the Hazardous Fuels surrounding homes in the Urban Interface by establishing perimeters of allowable vegetation at the 30, 50 and 100 foot radii. | Funding and equipment provided by Blaine County. Treatments to be carried out by Carey Fire Protection District. Coordinate efforts with surrounding Federal Agencies.      | Reduces the threat of wildland fires spreading to homes and creates survivable space. The health of the forest is improved as is wildlife habitat. Treatment provides some economic opportunities. | BLM and private lands adjacent to homes north of Carey.                            | Mechanically treat the areas of sage brush. Limb up and thin landscaped areas around homes using hand tools. Use chippers or pelletizer equipment to recycle biomass products.                                                                                     | 175           | Shrub 78    |
| Moderate            | Little Wood Reservoir Road, south of the Reservoir                       | Reduce the Hazardous Fuels surrounding homes in the Urban Interface by establishing perimeters of allowable vegetation at the 30, 50 and 100 foot radii. | Funding and equipment provided by Blaine County. Treatments to be carried out by Carey Fire Protection District. Coordinate efforts with surrounding Federal Agencies.      | Reduces the threat of wildland fires spreading to homes and creates survivable space. The health of the forest is improved as is wildlife habitat. Treatment provides some economic opportunities. | BLM and private lands adjacent to homes along Little Wood Reservoir Road.          | Mechanically treat the areas of sage brush. Limb up and thin landscaped areas around homes using hand tools. Use chippers or pelletizer equipment to recycle biomass products.                                                                                     | 1000          | Shrub 77    |
| Moderate            | Near Gannett and along Punkin Center Road                                | Reduce the Hazardous Fuels surrounding homes in the Urban Interface by establishing perimeters of allowable vegetation at the 30, 50 and 100 foot radii. | Funding and equipment provided by Blaine County. Treatments to be carried out by Carey Fire Protection District. Coordinate efforts with surrounding Federal Agencies.      | Reduces the threat of wildland fires spreading to homes and creates survivable space. The health of the forest is improved as is wildlife habitat. Treatment provides some economic opportunities. | BLM and private lands adjacent to homes near Gannett and along Punkin Center Road. | Mechanically treat the areas of sage brush. Limb up and thin landscaped areas around homes using hand tools. Use chippers or pelletizer equipment to recycle biomass products.                                                                                     | 150           | Shrub 70,82 |
| Moderate            | Near Picabo and along Picabo Desert Road                                 | Reduce the Hazardous Fuels surrounding homes in the Urban Interface by establishing perimeters of allowable vegetation at the 30, 50 and 100 foot radii. | Funding and equipment provided by Blaine County. Treatments to be carried out by Carey Fire Protection District. Coordinate efforts with surrounding Federal Agencies.      | Reduces the threat of wildland fires spreading to homes and creates survivable space. The health of the forest is improved as is wildlife habitat. Treatment provides some economic opportunities. | BLM and private lands adjacent to homes near Picabo and along Picabo Desert Road.  | Mechanically treat the areas of sage brush. Limb up and thin landscaped areas around homes using hand tools. Use chippers or pelletizer equipment to recycle biomass products.                                                                                     | 125           | Shrub 91    |
| Moderate            | West Magic                                                               | Reduce the Hazardous Fuels surrounding homes in the Urban Interface by establishing perimeters of allowable vegetation at the 30, 50 and 100 foot radii. | Funding and equipment provided by Blaine County. Treatments to be carried out by West Magic Fire Protection District. Coordinate efforts with surrounding Federal Agencies. | Reduces the threat of wildland fires spreading to homes and creates survivable space. The health of the forest is improved as is wildlife habitat. Treatment provides some economic opportunities. | BLM and private lands adjacent to homes in the West Magic Area                     | Mechanically treat the areas of sage brush. Limb up and thin landscaped areas around homes using hand tools. Use chippers or pelletizer equipment to recycle biomass products. Mowing to create a buffer for fire access and evacuation along all access roadways. | 5             | Shrub 67,68 |
